ADMINISTRATOR BOOT CAMP

Join Workfront's training experts during an intensive course focused on you, the system administrator.

We'll share tips and tricks on how to best optimize your Workfront system. Major topics include: system set-up, project timelines, reporting, and basic system clean up. Learn how to increase user adoption and set up your company's governance committee. With documentation and hands-on exercises, you'll walk away ready to be a successful system administrator.

PREREQUISITE COURSES

- Project Manager Fundamentals
- Administrator Fundamentals

Courses are available on **Workfront Ascent**.

The Boot Camp is designed for first-time Workfront system administrators who have received minimal training on the software.
