One Size Doesn't Fit All

You spoke, we listened

- Over 3000 responses on the Home beta feedback form
- Over 20 customer visits on the worklist
- Over 100 customer phone calls on the worklist
- Over 50 customer visits and phone calls on the calendar view

You spoke, we listened

Requests are not sorted by ready to start vs all, as they were in the old version. This is a necessary filter.

Must see the calendar or have it as an option to add. This is used daily by our team. Thank you.

I really like the work list (sorted by project in the view menu). I work best when I can see all my projects and tasks in one window. However, it would be nice to collapse and expand each project in this view... to manage long work lists.

Excited about the updates!
If there are no thumbnails for the documents, but only icons, it would be more efficient to reduce the size of the space each document take up.
